Nitra Fine®

Exceptionally soft and pliable, combining comfort with strength and integrity

Nitra Fine® from Polyco is a premium powder free nitrile disposable glove compliant to European Standard EN374, providing an effective barrier against oils, acids and other chemicals.

The high quality nitrile synthetic rubber that is used to manufacture the Nitra Fine® is extremely soft with increased elasticity and an improved feel, yet it still maintains a tensile strength that is comparable to natural rubber. In addition, it contains none of the proteins that are present in natural rubber that may cause an allergic reaction. Powder free, reducing the risk of product contamination, the Nitra Fine® is also food approved allowing use for food preparation or in environments where food is present. It is ambidextrous, and also has a beaded cuff for additional strength and for prevention of liquid roll back. It is available in two lengths, the longer 30cm length providing additional protection and optimum comfort around the wrist area.

CE 0088

Case Quantity
100 gloves per dispenser
10 dispensers per case

Handling Applications

- Automotive
- Schools
- Local Authorities
- Assembly
- Laboratory
